

### Output Quality & Market Advantage

#### The machine consistently produces:

- Uniformly sized husk chips
- Reduced fines and fibre dust
- Chips with superior structural integrity

#### These characteristics result in:

- Improved acceptance in export markets
- Higher suitability for horticulture and grow media
- Enhanced pricing due to consistent quality standards

#### Engineered for Precision. Built for Performance.

Platinum Engineering machines are not just built to cut husk - they are built to increase profitability, reduce wastage, and enhance product value.

## Original Sri Lankan Machine

# HUSK CHIPS CUTTING MACHINE

Sharp Cuts. Perfect Shape

- ✓ Uniform chip size
- ✓ Reduced husk wastage
- ✓ Heavy-duty industrial build
- ✓ Higher market value output

Sales • Spares • Service Available in India

### PLATINUM ENGINEERING

Husk Chips Machine Manufacturer

### Manufactured by Platinum Engineering

This machine is engineered on authentic Sri Lankan design principles to produce consistent, premium-quality husk chips with minimal fibre loss.

### Why Sri Lankan Type Design?

Sri Lankan husk chip machines are globally preferred for their precise blade geometry, cleaner cutting action, and superior chip consistency—resulting in better water retention and higher acceptance in export markets.

### Machine Features

#### Precision Cutting System

- Optimized blade angles
- Clean cutting without fibre crushing
- Uniform chip size

#### Heavy-Duty Construction

- MS fabricated body
- Vibration-free operation
- Long service life

#### Safe & Efficient Operation

- Controlled husk feeding mechanism
- Easy access for maintenance
- Continuous duty performance

### Applications

Coco husk chips manufacturing units

Horticulture & grow media producers

Export-oriented coir factories

Coir & agri entrepreneurs

### Why Choose Platinum Engineering Husk Chips Machine?

- ✓ Authentic Sri Lankan type cutting design
- ✓ Premium build quality with industrial-grade components
- ✓ Consistent, export-ready husk chips
- ✓ Low power consumption and efficient operation
- ✓ Easy maintenance and operator-friendly design
- ✓ Proven performance in real factory conditions
- ✓ Trusted by coir manufacturers

### Premium Sri Lankan Type Coconut Husk Chips Cutting Machine

The Sri Lankan Type Coconut Husk Chips Cutting Machine from Platinum Engineering is a premium-grade industrial machine, designed based on authentic Sri Lankan cutting geometry, globally recognized for producing high-quality husk chips.

### This advanced design ensures:

- Uniform chip size
- Minimal fibre damage
- Reduced husk wastage
- Higher market acceptance and better pricing

The precision-engineered blade system delivers clean cutting action, preserving the natural structure of the husk and enhancing the water retention and quality of the final chips - making them ideal for export markets, horticulture, and grow media applications. Built with a heavy-duty MS fabricated structure, the machine is suitable for continuous industrial operation, offering stable performance, low maintenance, and long operational life.
